After the shining  
example set by the  
Avatar, Britannia seemed  
all set to enter a  
golden age of peace and  
plenty. And then a great  
tragedy took place. Lord  
British, the beloved  
ruler who united the  
land of Britannia, and  
saw it through some of  
the hardest times in its  
history, was lost. He  
had gone on an  
expedition to explore  
the newly discovered  
underworld, and never  
returned. Many thought  
him dead. Lord  
Blackthorn took control  
in his absence,  
declaring martial law to  
maintain order. It was  
also around this time  
that the three  
shadowlords appeared at  
Stonegate. They were  
powerful, evil  
creatures, who could  
warp the minds of men  
and turn them away from  
the three principles.  
'Tis said they could  
draw on 'the power of  
the vortex' to transport  
themselves instantly  
anywhere in the realm.  
It was a dark time. The  
Avatar was summoned  
back to Britannia, and  
ultimately managed to  
rescue Lord British  
before the collapse of  
the Underworld,  
restoring him to his  
rightful place on the  
throne.
